Takeover of the

Portable Pressure Gauges/Calibrators from REVUE THOMMEN LTD

Ihre/Votre/Your Ref.

Vom/Du/Dated

Unsere/Notre/Our Ref.
KIRTW,4

Reigoldswil, December 2010

Dear THOMMEN-Customer,

we would like to welcome you and take the opportunity to introduce ourselves.

HUBER INSTRUMENTE is a SCS-accredited company doing business in development, manufacturing and calibration of high accuracy pressure instrumentation and calibration systems since 1978. We successfully serve customers in 24 countries on 4 continents.

The takeover of production and distribution of THOMMEN's "Handheld-Manometers" will expand our product range by high-quality, handy pressure gauges, perfectly adapted to on-site calibrations.

The actual production technicians will move to our company and continue to grant here for the reliability and precision well known by you.

All corresponding calibration activities will be integrated into our own calibration laboratory. This lab, accredited ISO 17025 by SAS/SCS, is with the number 018 actually the oldest one in Switzerland for the pressure property, leading in the calibration of very low pressures.

You, possibly a long term THOMMEN's customer, will find here products and services identical to those that you purchased till now; with a single exception: the THOMMEN brand will be replaced by the HUBER INSTRUMENTE logo.

We are looking forward to a mutually successful and fair cooperation and we present you our best wishes for a Merry Christmas and a happy and prosperous New Year.

With kind regards

HUBER INSTRUMENTE AG

Pressure Calibration - perfect. from Laboratory to Site
